

Help us design Bissell 307

A group of students at the Faculty of Information are working to transform Rm 307 into a studio workspace (like a makerspace, but please don't let that term constrain your ideas). We need your help getting started:

1. Take a few minutes to think about what you could do in a space like this and how you could use it.
2. Draw and write your ideas here. You can include tools, people, equipment, communities, concepts, a cup of tea...
3. Hand your sheet back to me, OR drop it in mailbox A20 (Dan S.), OR email it to jess.whyte@gmail.com, OR bring it to our first design session (May 19, 10-12 in Rm 307).

Your turn:

Because I'm hoping to work in a public library, I want to learn about "maker" curriculums and the basic skills needed to operate a makerspace in a library (e.g. 3D printing, Makey Makey, small Pi projects). A speaker series where librarians working in makerspaces talk about their experience would also be cool.

- Yes, you can share my contribution with others.
- No, please don't share my contribution. .
