

# Help us design Bissell 307

A group of students at the Faculty of Information are working to transform Rm 307 into a studio workspace (like a makerspace, but please don't let that term constrain your ideas).

We need your help getting started:

1. Take a few minutes to think about what you could do in a space like this and how you could use it
2. Draw and write your ideas here. You can include tools, people, equipment, communities, concepts, a cup of tea....
3. Hand your sheet back to me, OR drop it in mailbox A20 (Dan S.), OR email it to [jess.whyte@gmail.com](mailto:jess.whyte@gmail.com), OR bring it to our first design session (May 19, 10-12 in Rm 307).

Your turn: \_\_\_\_\_

Please leave  
as meeting  
space!  
Or 3D  
print me  
a meeting  
space  
when done.

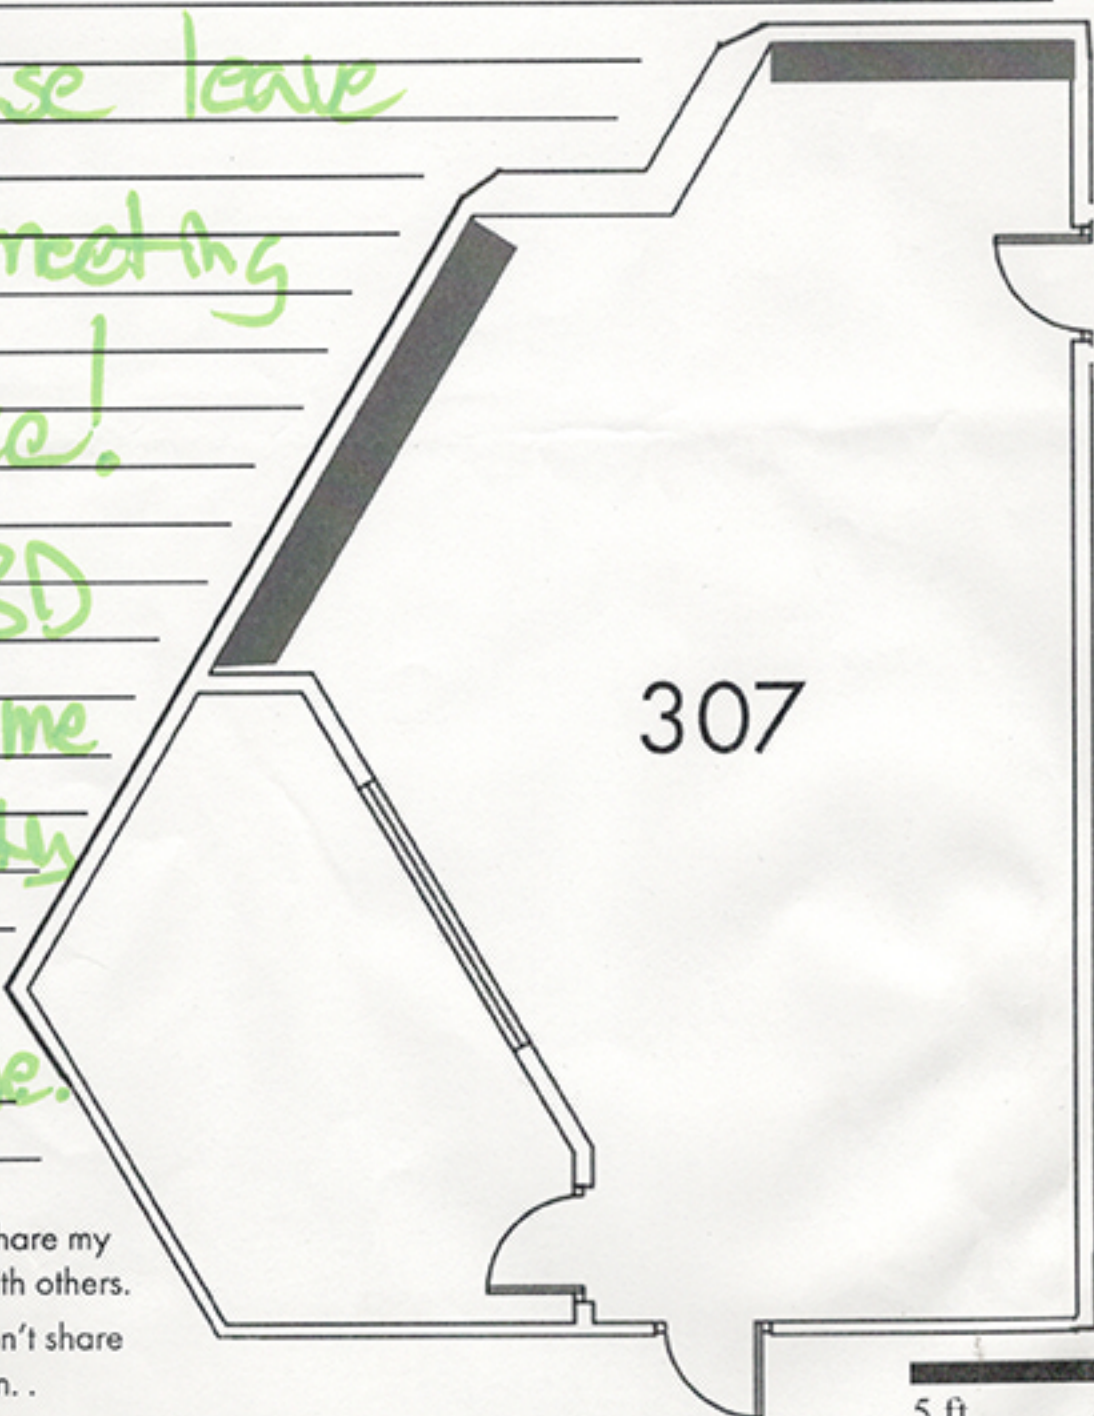

307

< 34.5ft >

5 ft

Yes, you can share my contribution with others.

No, please don't share my contribution.

A floor plan of room 307 is shown. The room has an irregular shape with several doorways. A diagonal wall section is shaded in grey. The number '307' is printed in the center of the room. On the right side, there is a vertical dimension line labeled '< 34.5ft >'. At the bottom right, there is a horizontal scale bar labeled '5 ft'. Handwritten in green ink on the left side of the plan are the notes: 'Please leave as meeting space! Or 3D print me a meeting space when done.' At the bottom left, there are two checkboxes: the first is checked and labeled 'Yes, you can share my contribution with others.', and the second is empty and labeled 'No, please don't share my contribution.'
