

Help us design Bissell 307

A group of students at the Faculty of Information are working to transform Rm 307 into a studio workspace (like a makerspace, but please don't let that term constrain your ideas). We need your help getting started:

1. Take a few minutes to think about what you could do in a space like this and how you could use it.
2. Draw and write your ideas here. You can include tools, people, equipment, communities, concepts, a cup of tea....
3. Hand your sheet back to me, OR drop it in mailbox A20 (Dan S.), OR email it to jess.whyte@gmail.com, OR bring it to our first design session (May 19, 10-12 in Rm 307).

Your turn: _____

- large white boards
- hot chocolate station
- iphone / phone charging area incase you forget your phone
- printing station (coin operated maybe)
- colour station (so we can colour code...)

- Smaller white boards that can be taken to tables

- blocks (or something similar) when we do exhibition projects

in our second year of the MMst program, we have a certain

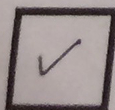

amount of space to work with,

something that will allow us to easily

visualize how we can use the space

would be helpful,

307

Yes, you can share my contribution with others.

No, please don't share
