

# Help us design Bissell 307

A group of students at the Faculty of Information are working to transform Rm 307 into a studio workspace (like a makerspace, but please don't let that term constrain your ideas). We need your help getting started:

1. Take a few minutes to think about what you could do in a space like this and how you could use it
2. Draw and write your ideas here. You can include tools, people, equipment, communities, concepts, a cup of tea....
3. Hand your sheet back to me, OR drop it in mailbox A20 (Dan S.), OR email it to [jess.whyte@gmail.com](mailto:jess.whyte@gmail.com), OR bring it to our first design session (May 19, 10-12 in Rm 307).

Your turn: \_\_\_\_\_

- white board - glass one like usability matters
- ~~up~~ up to date adaptiv's for projector
- smaller more intimate table set up
- microphone /speakers for observation room
- I like the observation room! I would use it but needs to be better hooked up
- Big whiteboard is very important - would use to conduct demonstrations on new platforms / projects, conduct testing sessions, hold design sessions
